Verdict and Instructions	YAMAHA Lithium ion Battery (ESB1) is for an electric wheelchair, so applicable to the above limitations. Also the battery does not exceed 300Wh (actual capacity of ESB1 = 280Wh) and meets the requirements of each test in the UN Manual of Tests and Criteria, Part III, section 38.3. Therefore, the battery is transportable by aircraft when the user and the operator follow the instructions in the above limitations. The main instructions in the above limitations are as follows: The battery must be removed from the vehicle. The battery must be protected from short circuit by insulating the terminals (e.g. by protective cap). The removed battery must be protected from damage for example by placing each battery in a protective pouch. The battery must be carried in the passenger cabin. Final instructions are subject to airline companies with reference to this document.
